

VIBHUTI SINGH

AI & Backend Systems Engineer

Noida (Delhi NCR), India · Open to Remote · vibhuti.singh037@gmail.com · vibhuti019.github.io · linkedin.com/in/vibhuti019 · github.com/vibhuti019

SUMMARY

AI & Backend Systems Engineer (4+ yrs) building high-scale distributed backends, AI-agent tooling, and open-source AI infrastructure. Creator of the open-source **AI Nexus Router** (Go + React) and an **MCP server** driving natural-language CRM operations at <120ms latency. Software Engineer 2 at DXC Technology; founder of Click To Automate.

EXPERIENCE

Software Engineer 2 — DXC Technology

Oct 2023 – Present

- Modernizing critical enterprise backends — migrating monolithic COBOL/Mainframe logic into scalable microservices with database and API-performance optimization.
- Sustaining 99.9% availability across deployments and operations on Azure cloud infrastructure.

Founder & Innovation Lead — Click To Automate

Sep 2025 – Present

- Lead technical vision for a business-automation agency delivering custom SaaS platforms and AI-powered workflows.
- Engineered a flagship **Model Context Protocol (MCP)** server (LLMs run CRM ops, queries, and API triggers in natural language at <120ms); architected and open-sourced the **AI Nexus Router** multi-provider LLM gateway (Golang + React, MIT).

Java Developer (Intern) — Paytm

Jun 2022 – Dec 2022

- Optimized high-throughput Transaction Services APIs; built Spring Boot / TestNG backend testing frameworks and automated suites that cut regression bugs.

Android Developer — Innoskrit

Oct 2019 – Jun 2020

- Shipped native Android apps in Java with robust network layers and RESTful API integration for real-time data sync.

KEY PROJECTS & OPEN SOURCE

AI Nexus Router *Go · React · Wails · MIT*

- Open-source AI Gateway that routes and optimizes multi-provider LLM requests; Go core + React, shipped as a binary and Wails desktop app. github.com/Click-To-Automate/ClickToAutomate-AI-Nexus-Router

ML Disease Symptom Checker *Python · NLP · FastAPI · Hugging Face*

- NLP/ML symptom-to-disease predictor on a scalable FastAPI backend; 94.8% accuracy across 40+ taxonomies. [GitHub](#)

KuberKhazana — Automated Stock Analysis *Spring Boot · React · Chart.js*

- Ingested TradingView webhooks and executed trades via broker APIs; processed 500+ automated daily trading signals with zero drop rate.

SELECTED FREELANCE

- **Click To Automate** — automation & AI-workflow platform; 50+ clients, 100k+ workflows/mo.
- **Banaras Karigari** — e-commerce backend & API infrastructure; 5,000+ orders/mo at 99.9% uptime.
- **Varanasi Darshan Tours** — booking & scheduling backend; 1,200+ bookings/mo.

TECHNICAL SKILLS

Languages: Go, Java, Python, JavaScript, TypeScript, SQL, COBOL

Backend & AI: Go microservices, Next.js, FastAPI, Spring Boot, REST APIs, MCP, LLM routing, NLP, Machine Learning, AutoML, Hugging Face

Cloud & Data: AWS, Azure, Docker, CI/CD, Linux, Git, MySQL, MongoDB, SQL

EDUCATION & CERTIFICATIONS

PG Certificate, Software Engineering for Data Science — IIIT Hyderabad & Great Learning

Nov 2024

B.Tech, Computer Science — ABES Engineering College

2022

Certifications: AWS Solutions Architect Associate (2023) · Secure Coding (Udemy, 2023) · CCNA (Cisco, 2021) · Linux Kernel Development (Linux Foundation, 2021)
